# What is Demodex Blepharitis?

Demodex blepharitis is a type of eyelid inflammation caused by microscopic parasites called Demodex mites. These mites live in the hair follicles and oil glands of the eyelids.

## Symptoms

Itchy eyes

Eye lashes easy to fall off

Dry eye

# Home Care for Blepharitis Prevention

## Eyelid Clean

Use eyelid clean wipe once or twice a day to kill mites.

## Eyelid Warm Compress

Use USB heating eye mask once or twice a day to soften blocked oil inside meibomian glands.
